

Company: Efficient Energy of Tennessee
Date: 4/26/2011
Time: 6:00 PM
Location: 813 Andrew Johnson Highway, Knoxville - (865) 386-7860

Description:

Come and see a 1MW Solar Farm.

Outside Knoxville, Tenn., a new construction project began raising eyebrows in May. The project was clearly visible from cars on the nearby Andrew Johnson Highway, but passers-by had no idea what to make of it at first, according to Robbie Thomas, president of Efficient Energy of Tennessee, a solar installer in Powell.

The 4,608 solar modules in the system were assembled by a Memphis-area Sharp factory. In fact, the installation includes that factory's 2 millionth module, a fact commemorated on the site with a gold-plated module.
